Subject: Initial Release: e-ISuite Application Version 1.00.00

Version 1.00.00 of the e-ISuite Application is now available for use. e-ISuite is the next generation version of I-Suite and replaces the current I-Suite Application. The e-ISuite system is a web browser (e.g. Internet Explorer) application.

There are two areas of use for the e-ISuite system:

- e-ISuite Enterprise System
- e-ISuite Incident Site

The e-ISuite Enterprise System is hosted on the USFS Fire and Aviation Management National Enterprise Support System (NESS) General Support System (GSS) at the National Information Technology Center (NITC), Kansas City, MO and supports all incidents at an Enterprise level. A NAP (NESS Application Portal) account is necessary for access. NAP Account information can be found on the e-ISuite web page: <http://eisuite.nwcg.gov>

The e-ISuite Incident Site version will be hosted on the incident server. When a connection to the Internet is available, data can be transferred to and from the e-ISuite Enterprise System. When a connection to the Internet is unavailable, data can be transferred to a portable media device, which can then be taken to a computer with an Internet connection and transferred to and downloaded from the e-ISuite Enterprise System.

For further assistance with access or the installation process, call the I-Suite Helpdesk at (866) 224-7677.
